

Founded in 1919, Clubs SA is the trading name for the 'Licensed Clubs' Association of South Australia' representing a range of sporting, ethnic, community and social Clubs in SA. Over the past 20 years changes to legislation can be attributed to the Association's commitment to maintaining its original mandate; to give Clubs a more equitable position towards becoming totally self-sufficient, whilst also providing the necessary infrastructure to promote sport and community related enterprises.

Clubs SA has a clear objective to preserve, promote and advance the interests of all Member Clubs. Under the umbrella of Clubs Australia, Clubs SA aims to represent the interests of its members, such as excise duties, taxation, federal industrial relations, fundraising techniques and codes of practice for gaming venues.

For over 90 years Clubs SA has been effectively representing the South Australian Licensed Club Industry to government, media and the general public. It also provides vital information and services for Member Clubs in their dealings with a range of government departments. As an industry, Clubs have the power to influence government decisions, and as a peak body Clubs SA is key to ensuring this power is effectively exercised.
